

NOTE :

Any deposit work is divided into 3 parts :

Part-I : The work of feeder bay including erection & commissioning of electrical equipments to be carried out at GETCO S/s end.

Part-II : The work of feeder bay including erection & commissioning of electrical equipments to be carried out at the substation at applicant's end.

Part-III : The work of erection of transmission line from GETCO end to Applicant's end such as overhead EHT line or underground cable.

The above mentioned work divided in 3 parts is carried out under following four Options :

- 1) **Option-I :** In this option all the three parts mentioned above are carried out by GETCO.
- 2) **Option-IA :** In this option Part-I and Part-III are carried out by GETCO whereas Part-II is carried out by the applicant.
- 3) **Option-II :** In this option, only Part-I is done by GETCO whereas Part-II & Part-III are done by the applicant.
- 4) **Option-III :** In this option all the three parts are done by the applicant.
